

Response to Intervention

In 2008-09, BVSD implemented an RtI model of support for students with diverse needs so that these students may have access to grade level curriculum to the greatest extent possible. Every school created a Problem-Solving Team that meets regularly to discuss student's needs and design school-based interventions for students to obtain targeted support. District staff is providing continued professional development opportunities this school year and a Resource Notebook is now provided for every principal and available on our website. Please see the link to learn more about this initiative on the **Student Success webpage**:
